

Potter Class Learning

We have made shelters for the animals on our farm. We talked about how to join the materials and how to make our structures strong.

We have been building outside. We thought about making our wall stronger by overlapping bricks.

We have been thinking about adding. We have worked out how many altogether to add two prices.

Please provide gloves and hat each day as the children have access to the outdoor learning space whatever the weather. Old/dark gloves are ideal.

We have completed many mega brain challenges to help our number and reading skills.
