Nathan wants to make a bookcase for his bedroom. It will be 110cm high and will contain four rows of books. Each shelf will be 55cm long.

The planks of wood cost £3.00 per metre and can be bought in lengths of 250cm.

The planks are 20cm wide and 2cm thick.

1	What will it cost to buy each plank
	of wood?

2	How many planks will be needed for
1.	the two sides?

3	How many planks will be needed for the top, bottom and the shelves

4	what is the total number of planks :
	needed to make the bookcase?

5	How much will it cost to buy all the	
	wood needed to make the bookcase? £	***

	Wood needed to make the bookease.	
6	How wide will the finished bookcase	22.50
	be, allowing for the thickness	
	of the sides?	.59c

/	what will be the total length of	
	the shelves on which books can	
	be placed?	 220

8	If the shelves are evenly spaced what	
	is the size of the tallest book that will	
	fit on the shelf?	

9	Nathan has a lot of books that are 25mm thick. How many of these		
	books will fit on each shelf?	-	 2

10	How many of these books will fit
	into the whole bookcase?

11	What is the total length of wood
	used to make the bookcase?

12	Approximately what length of wood
	will Nathan have left over in total?
